## MOOC VS MOORC

What's Mooc and why should one consider it over traditional MOOCs

2

## Curriculum Plan

Entire Curriculum plan with all the relevant resources sources.

3

## Completion Memento Concept

My plan for substituting certificate by a more robust "Completion Memento" which might be minted as a NFT

4

## Project Flowchart

How I plan to do the carry out the entire project stating all the stages involved during the project

# MOORC

## CONCEPT

---

### Research

Unlike typical MOOCs, the program's entire curriculum would be self-designed, with a variety of topics according to one's prerequisite knowledge and experience

---

### Hands-On Experience

By including real vendors, one is given access to the real labs and given hands-on experience with the modules' user interfaces.

---

### Open-Source

An open source and well-documented route that others can obeyed or assessed by others in the future

---

### Flexibility

The path can be made varied by combining several vendors, such as Google Cloud, AWS, and Azure. adding additional supporting materials, such as YouTube, for more variety

---

### Including A Project Report

In contrast to MOOCs, a MOORC would include a project report outlining its procedures, lessons learned, and future plans. Compared to a regular certificate, it can be evaluated more favourably and would be worth more.

---

### Completely Free

The ability to mix and match different resources thanks to freedom of choice means that almost all of them could be free or open source, which is unusual in MOOCs.

# MOORC— VS MOOC

	MOOC	MOORC	
	✓	✓	
Self-Paced	✓	✓	
Flexibility	✗	✓	As MOORC is Self-Designed it isn't limited to a single resource. Multiple Resources can be combined to for a curriculum
Entirely Free	✗	✓	Every part of MOORC can be made from combining free courses from GCP, AWS academy, Azure Academy, or other free MOOCs.
Certificate on Completion	✓	✗	Instead would use "Completion Memento"
Practical Labs	✗	✓	Most MOOCs won't provide LABS, however when learning from vendors, I can get hands on experience on the Platforms
Assesment Tests	✓	✓	
Custom Syllabus	✗	✓	As it's self-Made, Syllabus can be adjusted according to needs, I don't have to start from scratch

To Project report

It can further be minted  
as a NFT to show proof  
of ownership

Unlike Normal Certificate the  
Memento would have a Project report  
attached which can be viewed by  
anyone in future
